

SELINUX MOODLE

```
semanage fcontext -a -t httpd_sys_content_t "/data/sites(/.)?/html(/.)?"
```

```
semanage fcontext -a -t httpd_sys_rw_content_t "/data/sites(/.)?/mdata(/.)?"
```

```
semanage fcontext -a -t httpd_log_t "/data/sites(/.)?/logs(/.)?"
```

```
sudo setsebool -P httpd_can_network_connect_db on
```

```
sudo setsebool -P httpd_can_network_connect on
```

```
sudo restorecon -Rv /data/sites/
```

```
sudo systemctl restart php-fpm
```

```
sudo systemctl restart nginx
```

INSTALAR MOODLE GCP

Rocky Linux 8

```
sudo yum install nginx
```

— Configurar nginx

Agregar disco externa

— formater disco primero

```
mkfs.xfs /dev/sdb
```

— mountar el disco

```
mkdir /data
```

```
mount /dev/sdb /data
```

Instalación de PHP7.4

```
dnf module list php
```

— habilitar la versión php7.4

```
dnf module enable php:7.4 -y
```

— instalar paquetes de php necesarios

Instalación de htop / zip /unzip / wget

```
dnf install epel-release -y
```

```
sudo yum install htop zip unzip wget telnet -y
```

Instalación de Ghostscript

```
dnf install ghostscript -y
```

Instalación de SEMANAGE

```
dnf install policycoreutils-python-utils -y
```

Instalación de Locale UTF-8

```
sudo dnf install glibc-langpack-es glibc-locale-source -y
```

```
sudo dnf groupinstall "Development Tools" -y
```

```
sudo localedef -i es_ES -f UTF-8 es_ES.UTF-8
```

```
sudo localedef -i es_EC -f UTF-8 es_EC.UTF-8
```

```
sudo localectl set-locale LANG=es_ES.UTF-8
```

```
sudo vim /etc/php.ini
```

```
date.timezone = America/Guayaquil
```

```
sudo systemctl restart php-fpm
```

```
sudo systemctl restart nginx
```

Set time America/ Guayaquil

```
sudo timedatectl set-timezone America/Guayaquil
```

```
systemctl restart php-fpm
```

```
systemctl restart nginx
```

PHP-Sodium Rocky Linux 8

```
sudo dnf groupinstall "Development Tools" -y
```

```
sudo dnf install -y libsodium-devel
```

```
sudo dnf install -y php-devel
```

```
cd /usr/local/src
```

```
sudo dnf download --source php
```

```
mkdir -p /usr/local/src/php-srpm && cd /usr/local/src/php-srpm
```

```
sudo rpm2cpio ../php-*.src.rpm | sudo cpio -idmv
```

```
sudo tar -xf php-7.4.33.tar.xz
```

```
cd php-7.4.33/ext/sodium
```

```
sudo phpize
```

```
sudo ./configure --with-php-config=/usr/bin/php-config
```

```
sudo make -j$(nproc)
```

```
sudo make install
```

```
echo "extension=sodium" | sudo tee /etc/php.d/40-sodium.ini
```

```
sudo systemctl restart php-fpm
```

```
sudo systemctl reload nginx
```
